

FACTORY

ARTITECH Automotive was established in 2019 in BURSA / Kayapa Organized Industrial Zone and took part the sector with the target of 450.000 Units/year Installed Capacity with High Pressure Steam Technology in a closed area of approximately 4,000 M2.

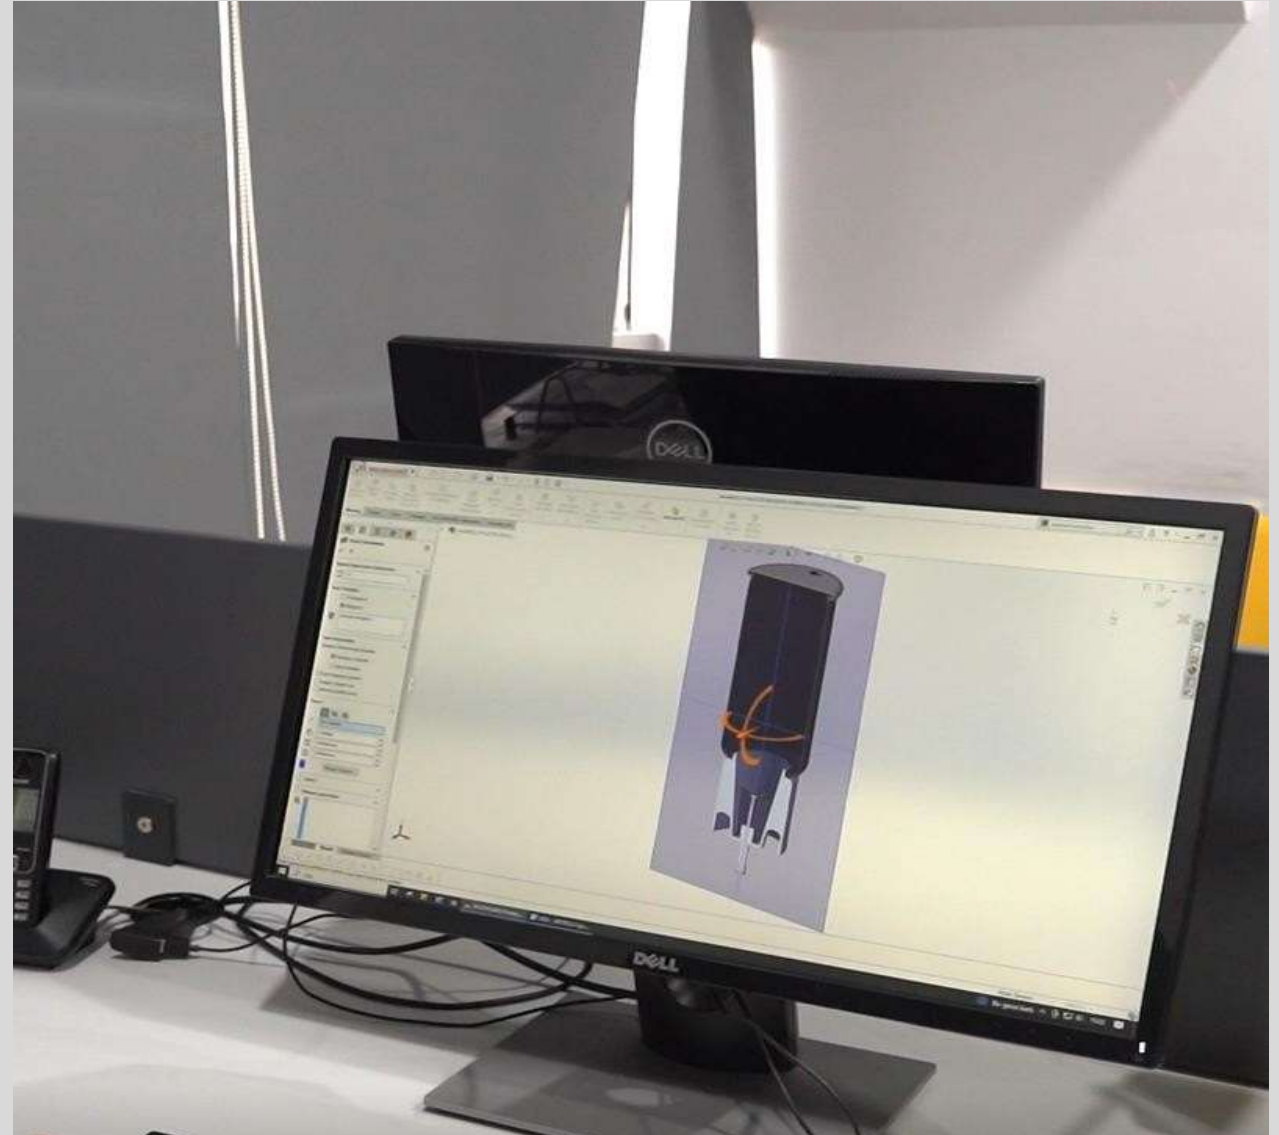

LABORATORY

It has extent of required laboratory for the production of air springs. In addition, with its advanced testing techniques and controls have been controlling in order to satisfy customer expectations.

DESIGN

Advanced technology machines and 3D modelling are integrated in order to provide advantage to our customers. And by using of technological machines, we can produce precise, consistent and high-quality air springs.

TECHNOLOGY

The air springs is manufactured with the latest technology of industry-specific special machines. Therefore, we aim to satisfy expectitons of our customers.

TEAM WORK

At factory aims at problem solving techniques, error analysis, continuous amendment and development along with all the departments.

MACHINE

The factory aim to maximize our capacity of producing air springs with the latest technology for our partner.

PRODUCT

The process of the production is designed at the highest level and all the product components has been supplying from the companys which has on the first class quality. In addition, the principle of traceability is our priority.

SHIPMENT

We provide to deliver our products right on time and reliable forwarding in order to satisfy our customers expectations, considering storage and packaging.
