# **THE BENEFITS OF USING HEATED MIRRORS**

## **Tired of Poor Winter Visibility? Heated Mirrors Can Help**

As if bitter cold temperatures and hazardous road conditions aren't enough to deal with during the winter, there's the added challenge of keeping your mirrors clear. When snow, ice, sleet, and other winter weather creations begin to pile up on your side mirrors, it can become dangerous for both drivers and other road motorists on the road.

Whether your fleet is full of trucks, buses, tractor-trailers or other applications, fitting your vehicles with heated mirrors can help ensure a safe journey all year long.

### **The Benefits of Using Heated Side Mirrors**

Putting heated mirrors on your vehicle or fleet may seem like an extravagance — are they *really* worth the expense and maintenance when they really come in handy for one season out of the year?

If you've ever driven a heavy-duty truck during a blizzard and not been confident about what's around and behind you due to snow or ice on your mirrors, then you already know the answer is yes. One wrong calculation while driving in snow and ice can cost you and your company in multiple ways, and there is no price tag on being as safe and confident as you can be at highway speeds during the winter.

One common misconception with heated mirrors is that they're only good for ice and snow. But heated mirrors are also super handy to have in the rain. Have you noticed how difficult it is to get a clear view around your vehicle during a downpour? Heated mirrors come in handy here, too.

To break down how heated mirrors can benefit you:

- They're a proven safety feature during the winter
- They can also help keep your visibility clear in the rain
- They're easy to turn on and off from the comfort of your cab
- They can be fit for multiple applications and styles of mirrors including convex and West Coast

## **Where to Buy SME Heated Mirrors**

Regardless of what winter weather looks like where you live and where you drive, investing in a SME heated mirror can add a new level of safety and clarity to your drive all year long. We've got a full haul of heated mirrors and other mirror system solutions from SME for your truck, bus, tractor-trailer, and multiple other applications.
