Worimex Co. ile tanışın.

“Üreticiden son tüketiciye kadar profesyonel satış ağı, uygun maliyetli kaliteli ürünler!”

Worimex Co. olarak 10 seneyi aşkın tecrübemiz ile değişen talepler ve gelişen sektörel faaliyetlerin sürdürülmesi adına yeni projeleri hayata geçiriyoruz. Kombi, ısıtma ve pompa sektörüne attığımız ilk adımdan bugüne dek hedeflerimizi hızla geliştiriyoruz.

Süreklilik kavramının önemine inanıyoruz!

Değerli iş ortaklarımız ve müşterilerimizin yanı sıra doğaya, ülke ekonomisine, sektöre ve tüm dünyaya katkı sağlamak adına süreklilik ve şeffaflık kavramları ile yolumuza hızla devam ediyoruz!

Sizin için düşünüyor, üretiyor, depoluyoruz!

Dünyanın farklı noktalarından edindiğimiz bilgi ve deneyim ile bir üründen en yüksek verimi almak ve geliştirmek öncelikli hedefimiz! Worimex Co. ekibi olarak farklı satış teknikleri, üretim stratejileri, işletme ve planlama dahil yenilikleri keşfederek, hayata geçiriyoruz.

Küresel gücümüz ile büyütüyoruz!

80'in üzerinde sektör lideri müşteri ve sahip olduğumuz güçlü portföyümüzün yanı sıra 14 ülkeye ihracat gerçekleştirerek, küresel işbirlikleri ile global ağı kurduk. Almanya, Avusturya, Çin, İtalya'da artan tanınırlığımız ve işbirliklerimiz ile sürekli büyütüyoruz!

Önemsiz görülenin değerini ortaya çıkarıyoruz!

Müşterilerimiz için kontrollü stok yönetim stratejilerimiz ile hizmet kalitemizden asla ödün vermiyoruz.

Değişen alışkanlıklarınızın farkındayız!

Biliyoruz, beklentileriniz, gündelik alışkanlıklarınız, talepleriniz sürekli değişiyor. Çözüm ortağınız olarak distribütörü olduğumuz firmalara ve müşterilerimize kısacası ürünlerimizden fayda sağlayacak herkesin yaşamına kolaylık sağlamak için ara vermeden çalışıyor ve projelerimizi hayata geçiriyoruz!

worim

Meet with Worimex Co.

"Professional sales network from the manufacturer to the end consumer, cost-effective quality products!"

As Worimex Co. , we are implementing new projects in order to sustain changing demands and developing sectoral activities with our experience of more than 10 years. Since the first step we took in the combi boiler, heating and cooking sector, we have been rapidly developing our targets.

We believe in the importance of the concept of continuity!

In addition to our valuable business partners and customers, we continue our way with the concepts of continuity and transparency in order to contribute to nature, the country's economy, the sector and the whole world!

We think, produce and store for you!

Our primary goal is to obtain and develop the highest efficiency from a product with the knowledge and experience we have gained from different parts of the world! As Worimex Co. team, we discover and implement innovations including different sales techniques, production strategies, business and planning.

We Are Growing With Our Global Power!

In addition to our strong portfolio with over 80 industry-leading customers, we exported to 14 countries and established a global network with global collaborations. We are constantly growing with our increasing recognition and collaborations in Germany, Austria, China, Italy!

We reveal the value of the unimportant!

We never compromise on our service quality with our controlled stock management strategies for our customers.

We are aware of your changing habits!

We know that your expectations, daily habits and demands are constantly changing. As your solution partner, we work non-stop and bring our projects to life in order to make life easier for the companies we distribute and our customers, in short, everyone who will benefit from our products!

Ana Eşanjörler

Main Heat Exchangers

Brülörden aldığı sıcaklık ile musluğa giden ve tesisata giden suyu ısıtmaktır. Bu görevini pompa sayesinde sağlamaktadır. Brülörden aldığı su ile içinden geçen suyu ısıtmaktadır. Çift eşanjörlü ve tek eşanjörlü kombilerin tamamında bulunmaktadır. Konvansiyonel kombilerin Bitermik modellerinde 4 giriqli, monotermik modellerinde 2 giriqli, materyal olarak genellikle bakır ancak bazı modellerde alüminyum üretilmektedir. Yoğuşmalı kombilerde ise 2 giriqli ve paslanmaz çelik hammaddesi ile üretilmektedir.

The main heat exchanger is to heat the water going to the tap and the installation with the heat it receives from the burner.

It provides this task thanks to the pump. It heats the water passing through it with the water it receives from the burner. It is available in all double and single heat exchanger boilers. Bithermic models of conventional boilers have 4 inputs, and monothermic models have 2 inputs. The material is usually copper, but aluminum is produced in some models. Condensing combi boilers are produced with 2 inputs and stainless steel raw material.

Akış Kontrol Elemanları

Flow Control Elements

Bazı kombilerde şalter, bazılarında türbin kullanılmaktadır.
Su açılması ile kombinin elektronik kartına komut veren alandır.

*Some boilers use a switch, and some use a turbine.
It is the area that gives a command to the electronic card of the combi
when the water is turned on.*

Aşırı Isı Sensörleri

Limit Thermostat

Tüm kombilerde bulunan cihazın bir sebeple aşırı ısınması sonucu devreye girerek cihazın çalışmasını engelleyen parçaya limit termostat denir.

The part in all combi boilers that activates as a result of overheating of the device for some reason and prevents the device from working is called the limit thermostat.

Ateşleme Üniteleri

Ignition Transformer

Ateşleme trafosu, gaz kontrol valfi ile birlikte çalışır.
Karttan gelen uyarılar doğrultusunda brülörün ateşlemesini sağlar.

*The ignition transformer works together with the gas control valve.
It enables the burner to ignite in line with the warnings from the card.*

Bağlantı Parçaları

Connection Part

Kombide bulunan ana parçaların birbirine montajlanması, daha kolay çalışması için gerekli olan yan parçalardır.

These are the side parts that are necessary for the assembly of the main parts of the combi and for easier operation.

Doldurma Muslukları

Filling Taps

Kazan tesisatının su basıncı düştüğünde ve 1 barın altına düştüğünde barı yükseltme barına sahip olan kısımdır. Bazı model kombilerde otomatik su doldurma özelliği bulunurken, bazı model kombilerde kombi altına monte edilmektedir.

It is the part that has the task of raising the bar when the water pressure of the combi installation decreases and falls below 1 bar. Some model combi boilers have automatic water filling function, while some model combi boilers are mounted under the combi.

Elektronik Kartlar

Main Boards

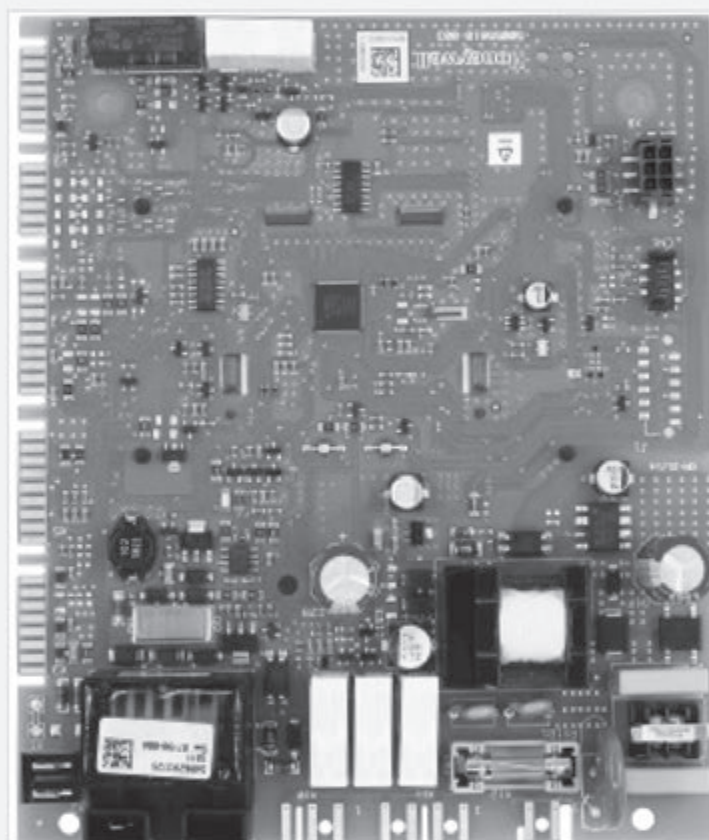

Kombinin ısı seviyesi ve elektronik ayarları kombi kartı olarak bilinen anakarttan düzenlenir. Bu parça için bir anlamda kombinin beynidir de diyebiliriz.

The heat level and electronic settings of the combi boiler are regulated from the motherboard known as the boiler card. In a sense, we can say that this piece is the brain of the combination.

Emniyet Ventilleri

Safety Valves

Kullandığınız kombinin tesisat basıncı 3 barı geçtikten sonra kombinin yüksek basınç nedeniyle zarar görmemesi için kombideki fazla suyu dışarı tahliye etme görevi gören parçadır.

After the installation pressure of the combi you are using exceeds 3 bar, it is the part that serves to discharge the excess water in the combi so that the combi is not damaged due to high pressure.

Hermetik ve yoęuşmalı kombilerde mevcut olan, dış ortamdan temiz havayı alarak brülörde yanma oluşmasını sağlayan, yanma sonucunda ise yanan atık gazı dışarı gönderme görevinde olan önemli parçalardan biridir.

It is one of the important parts in hermetic and condensing combi boilers, which takes the fresh air from the outside and ensures combustion in the burner and sends the burning waste gas out as a result of combustion.

Gaz Valfleri

Gas Valves

Tesisattan aldığı gazın bir bölümünü elektronik karttan aldığı voltaj ile brülöre gönderen, brülörde yanma oluşmasına katkı sağlama görevinde olan parçadır. Kombide gaz grubu ya da gaz armatörü olarak da bilinmektedir.

It is the part that sends some of the gas it receives from the installation to the burner with the voltage it receives from the electronic card and contributes to the formation of combustion in the burner. It is also known as gas group or gas armature in combi boiler.

Uyarı ve Önlemler:

Güçlü sızdırmazlık ve yağlama için PTFE içerir

-Saydam Beyaz Renk

-Isıya Dayanıklı , Damlama Yapmaz

Sıcaklık aralığı -40°C ila 200°C

Lütfen MSDS'yi kontrol edin.

***MOLYKOTE 111 bileşimi ile doldurulmuştur.**

Warning & Precautions:

Includes PTFE for strong sealing and lubricating

-Color Translucent White

-Fire-Proof, Does not Drip

Temperature range -40°C to 200°C

Please control MSDS.

***Filling with MOLYKOTE 111 compound.**

BDR

GAZ VANASI

Gas Valve

Boiler gas valves, in gas-fired domestic type central heating boilers and water heaters with automatic ignition system developed for use.

Gas valves are also suitable for use on a wide variety of gas powered appliances.

Kombi gaz vanaları, gazla çalışan ev tipi merkezi ısıtma kazanlarında ve otomatik ateşleme sistemli su ısıtma cihazlarında kullanılmak üzere geliştirilmiştir. Gaz vanaları, ayrıca çok çeşitli gazla çalışan cihazlarda kullanım için uygundur.

Genleşme Tankları

Expansion Vessel

Kombi, kazan, merkezi sistemlerde ısınan sıcak su hacminin genleşmesi ile oluşan fazla suyun sistemde bulunan mekanik parçaların yüksek basınçtan zarar görmesini engellemek için kullanılır. Kalorifer sistemi yavaş, yavaş soğumaya geçtiğinde tankta bulunan su tekrar sisteme yayılır.

It is used to prevent the excess water formed by the expansion of the heated hot water volume in boilers, central systems, and the mechanical parts in the system from being damaged by high pressure. When the heating system cools down slowly, the water in the tank spreads back into the system.

Hidrobloklar

Hydroblocks

Kombinin su merkezidir, suyun akış yönünün belirlenmesi, akış kontrolünün gerçekleştirilmesi, yetersiz basınç durumlarında bar yükseltilmesi işlemlerinin yapıldığı genel bir parçadır.

Hydroblocks are the water center of the boiler. It is a general part where operations such as determining the flow direction of the water, realizing the flow control, raising the bar in cases of insufficient pressure are made.

Otomatik Hava Purjörleri

Air Purgers

Otomatik Hava Purjörleri: Var olan havayı otomatik olarak tahliye etmeye yararlar. Bu sayede istenmeyen gürültüler, pompada oluşabilecek kavitasyon, devredeki cihazların korozyonu ve ısıtma ünitelerinde oluşabilecek bölgesel termal dengesizlik önlenmiş olur.

Air Purgers serve to automatically evacuate existing air. In this way, unwanted noises, cavitation that may occur in the pump, corrosion of the devices in the circuit and regional thermal imbalance that may occur in the heating units are prevented.

Motorlu Vanalar ve Step Motorlar

3 Way Valves & Step Motors

Suyun akış yönünü belirleyen parçalardır. Motorlu Vanalarda on-off yöntemi ile, step motorlarda ise adım takip yöntemi ile çalışmaktadır.

They are the parts that determine the flow direction of the water. It works with on-off method in motorized valves, and with step tracking method in stepper motors.

Plaka Eşanjörleri

Plate Heat Ex

Plakalı eşanjörler sıcaklıkları farklı iki akışkanın birbirinden plakalar yardımı ile ayrıldığı ve bu plakaların iki akışkan arasında ısı transferi yapmasını sağlayan tesisat ekipmanıdır. Kombilerde kullanım suyunu ısıtmaya yarayan bir parçadır.

Plate heat exchangers are installation equipment that separates two fluids with different temperatures with the help of plates and allows these plates to transfer heat between two fluids. It is a part that is used to heat the domestic water in combi boilers.

Ntc Sensörler

Ntc Sensörs

Ortamdaki ısı değişimini algılamamıza yarayan cihazlara ısı veya sıcaklık sensörleri diyoruz. Birçok maddenin elektriksel direnci sıcaklıkla değişmektedir. Sıcaklığa karşı hassas olan maddeler kullanılarak sıcaklık kontrolü ve sıcaklık ölçümü yapılır.

The devices that allow us to detect the temperature change in the environment are called heat or temperature sensors. The electrical resistance of many materials changes with temperature. Temperature control and temperature measurement are made by using substances that are sensitive to temperature.

Sirkülasyon Pompaları

Circulation Pumps

Kombi yâda kazanda üretilen sıcak suyun ısıtma sistemi boyunca devir daim yapmasını sağlayan pompalara sirkülasyon pompası denir.

The pumps that circulate the hot water produced in the boiler throughout the heating system are called circulation pumps.

Rotorlar

Rotors

Kombi ya da kazanda bulunan rotor, suyun pompa içinde dönmesini sağlayan ve akışın sürekliliğini koruyan ana bileşendir. Rotorun verimli çalışması, sirkülasyon pompasının performansını doğrudan etkiler.

The rotor in a boiler or circulation pump is the main component that enables the water to rotate within the pump and maintain continuous flow. The efficiency of the rotor directly affects the pump's overall performance.

Su Sondajları

Water Pressure Switch&Transducers

Tesisattaki su basıncını ölçme ve elektronik karta bildirme görevinde olan parçadır. Yalnızca manometre kullanılan kombilerde siviç, ekranlı olan kombilerde ise transducer kullanılmaktadır.

It is the part that is responsible for measuring the water pressure in the installation and reporting it to the electronic card. Water Pressure Switches are used in boilers only for manometer, and transducer is used in boilers with a screen.

Tamir Takımları

Repair Kits

Kombinizin içindeki suyun mekanik olarak yönlendirilmesini sağlayan parçadır. Tamir takımları, motorlu valfler ve step motorlarla çalışır.

It is a part that provides mechanical direction of the water inside your combi. Repair kits work with motorized valves and stepper motors.

BDR CONTROL, Basınç Anahtarları, Manometreler, Termo-Manometreler, Kimyasal Sıvılar, Sensörler İlgili ürünlerde uluslararası piyasaları yakından takip eden BDR Control, tüm şirketlerinin gücüyle küresel rekabet koşullarını yakalamayı ve dünya standartlarına ulaşmayı hedeflemekte ve bu amaçla güçlü adımlarla ilerlemektedir.

BDR Control çatısı altındaki ürünler ile, gerçekleştirdikleri finansal yükümlülüklerin yanı sıra, bütün faaliyetlerinde topluma, çevreye ve ekonomiye değer katmaktadır.

BDR CONTROL, Pressure Switches, Manometers, Thermo-Manometers, Chemical Liquids, Sensors BDR Control, which closely follows international markets in related products, aims to catch global competition conditions and reach world standards with the strength of all its companies, and takes strong steps towards this end.

With the products under the umbrella of BDR Control, in addition to the financial obligations they perform, they add value to the society, environment and economy in all their activities.

Manometreler ve Termomanometreler

Manometers and Thermomanometers

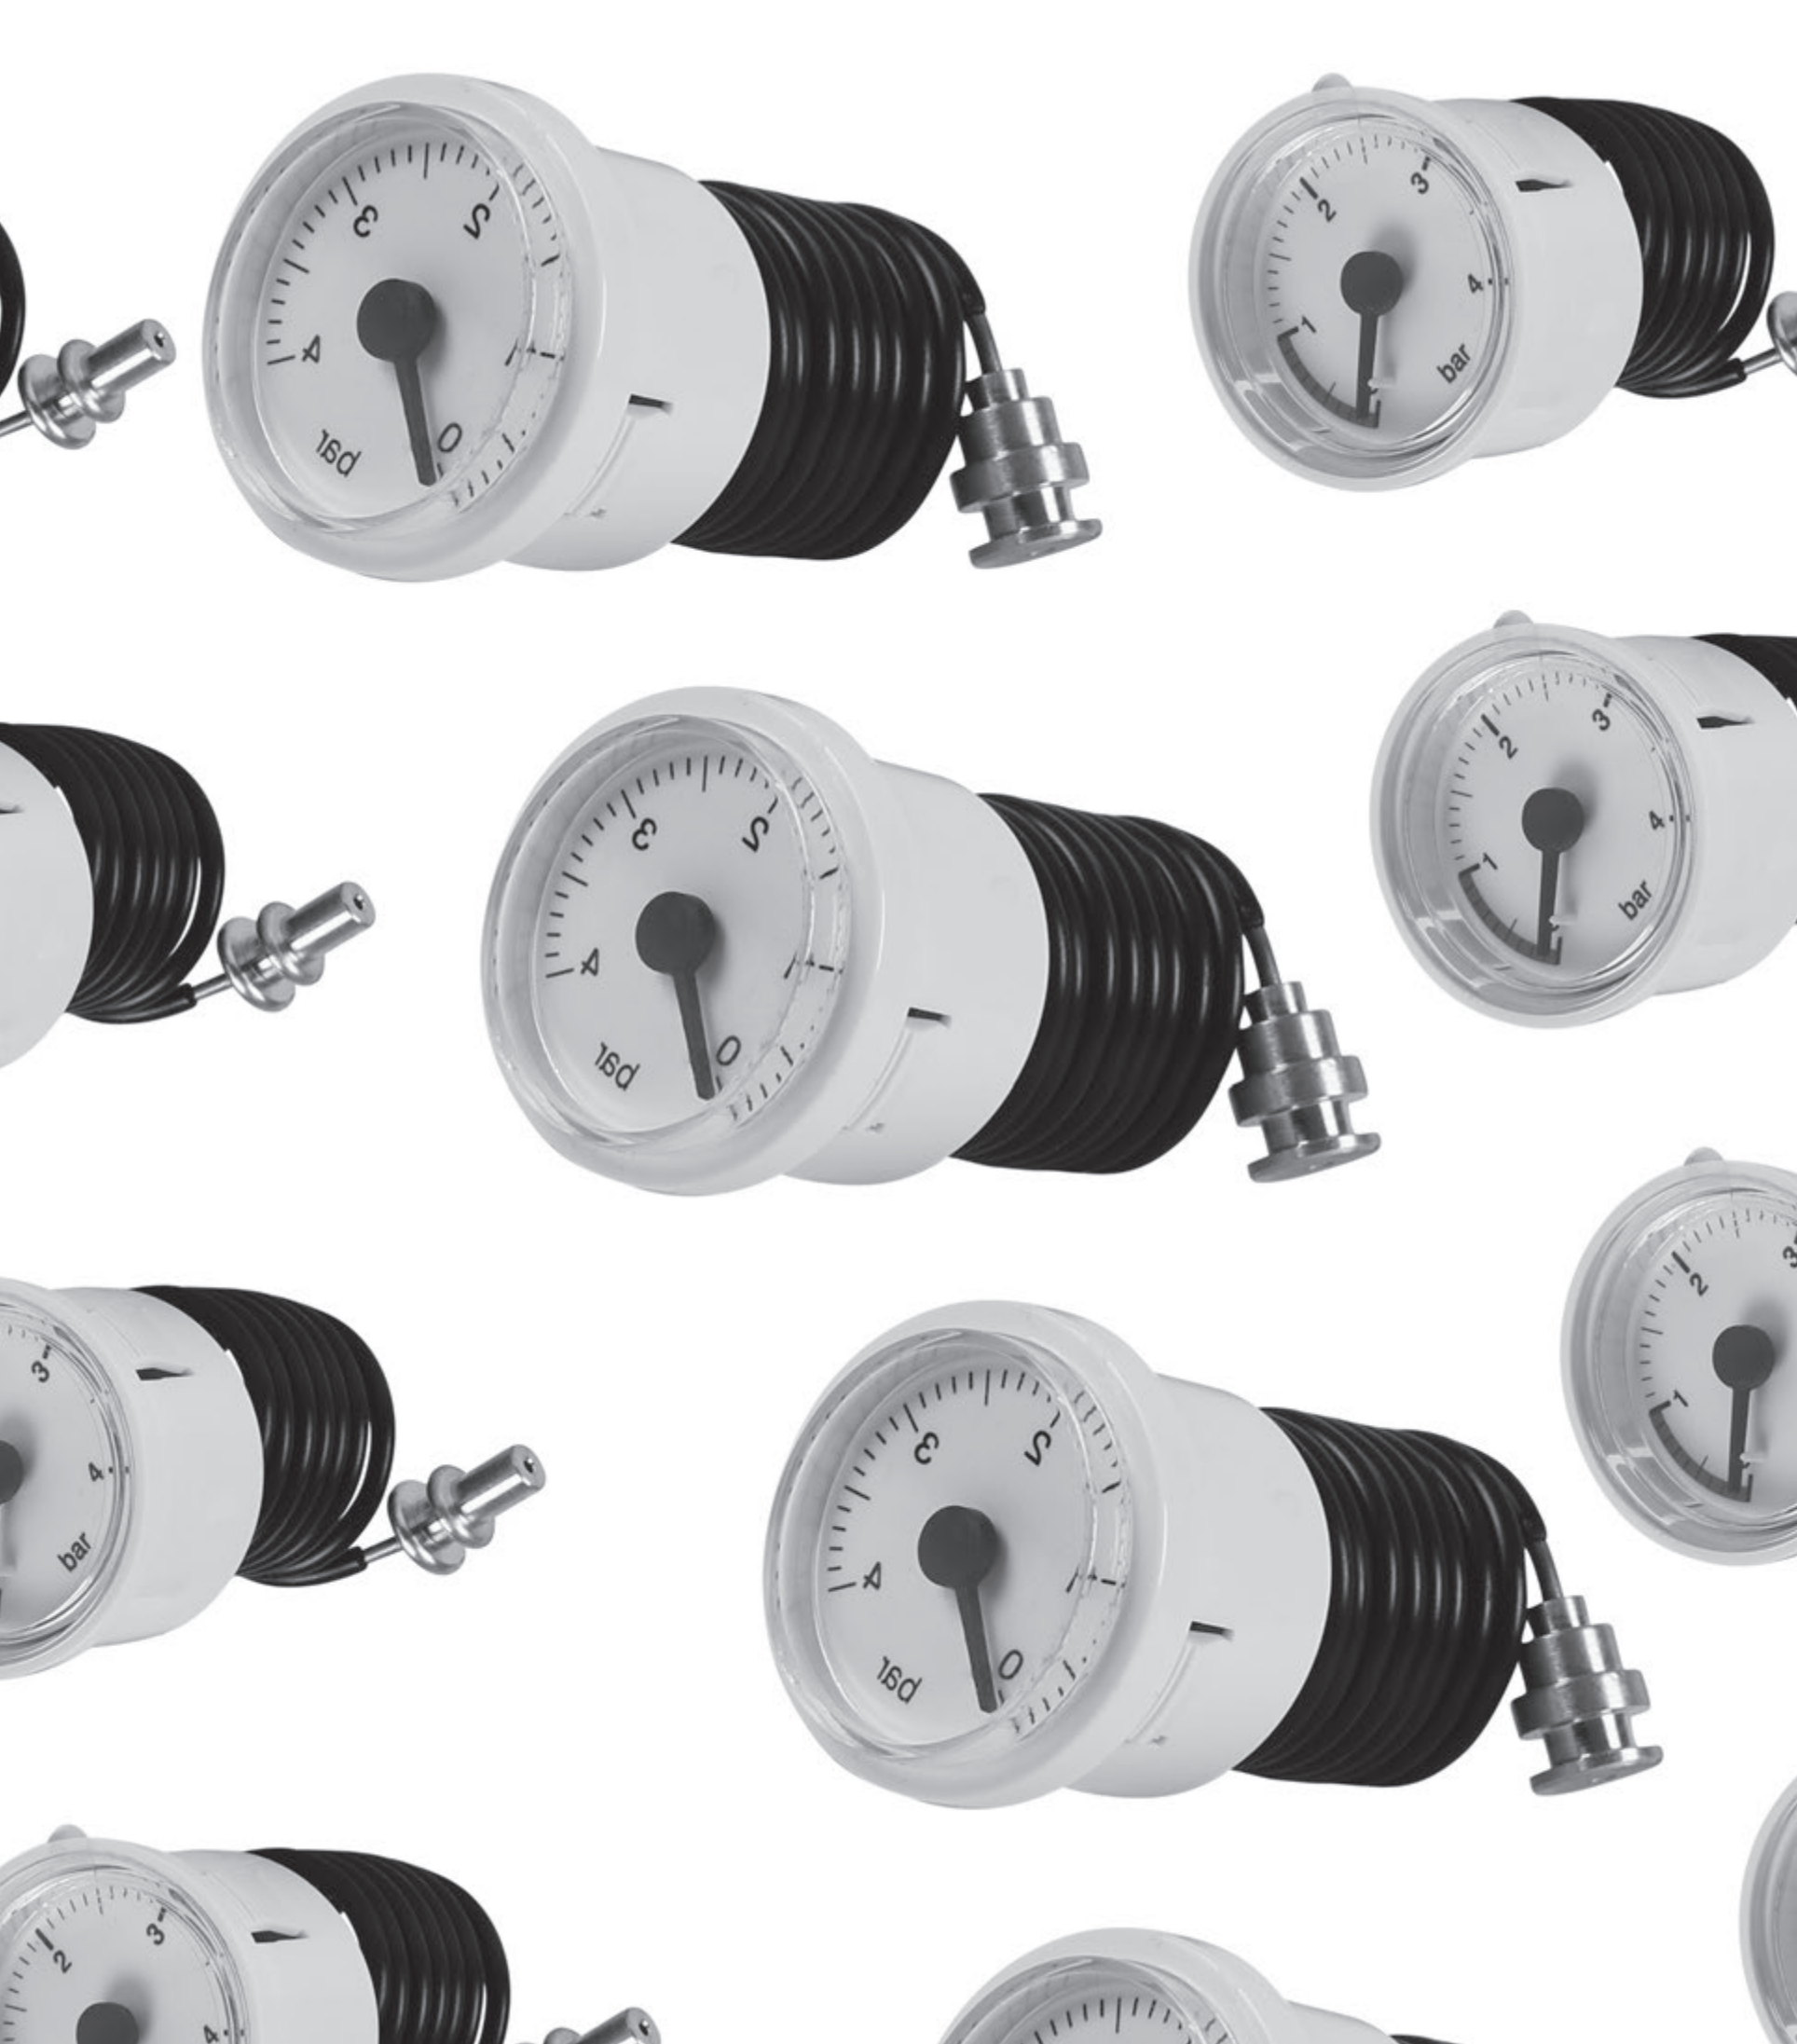

Kombinin kalorifer devresindeki su basınç değerini gösteren parçaya manometre (basınç göstergesi) denir. Ayrıca basınç ile birlikte sıcaklık gösteren parçaya ise termo-manometre denir.

The part that shows the water pressure value in the boiler's heating circuit is called the manometer (pressure gauge). In addition, the part that shows temperature together with pressure is called a thermo-manometer.

Hava Prosestatları

Air Pressure Switches

Konvansiyonel (hermetik) model kombilerin bir parçasıdır. Kazan içindeki hava sirkülasyonunu kontrol eder. Hermetik model kombiler için baca koruyucu olarak da adlandırılır. Hava sirkülasyonu sırasında fan motorundan gelen hava basıncı ile temas eder ve baca hava akışını anakarta bildirmek üzere hareket eder.

It is a part found in conventional (hermetic) model combi boilers. It controls the air circulation in the boiler. It is also called chimney guard for hermetic model combi boilers. During air circulation, it makes contact with the air pressure coming from the fan motor and acts to report the flue air flow to the motherboard.

METAL HAVA SİVİCİ, *Metal Air Pressure Switch*

YAPISAL ÖZELLİKLER

Orta : Hava ve nötr gazlar

Çalışma Basınç aralığı : 20 ... 400 Pa

Elektrik Bağlantısı : Yassı konektör 6,3 veya 4,8 ı

Basınç Bağlantısı : Hortum bağlantısı Ø 6,2 mm

Anahtarın takılması; Kolay montajlama

Güvenliği ayarlama

Silikon diyafram; Benzersiz yamuk diyafram tasarım daha iyi bir kontak serbest bırakma ve dolayısıyla dal doğru bir anahtarlama noktası sağlar.

Kalite ve Süreklilik

Worimex Co. olarak, tüm çalışanlarımızla birlikte kalitemizi sürekli geliştirmeye kararlıyız. Toplam Kalite Yönetimi anlayışını benimseyerek, bu yaklaşımı tüm süreçlerimize entegre ettik. Amacımız, müşteri ihtiyaçlarını tam olarak karşılamak, siparişleri zamanında teslim etmek ve her zaman en iyi hizmeti en doğru değerlerle sunmaktır.

Müşterilerimiz için güvenilir bir iş ortağı olmayı hedefliyor, ürün ve hizmet kalitemizi sürekli geliştirerek müşteri memnuniyetini artırıyoruz. Sektörümüzdeki yenilikleri yakından takip ediyor, tedarikçilerimizle güçlü ilişkiler kurarak kaliteli ve uygun maliyetli ürünler sağlıyoruz.

Çalışanlarımızın gelişimi bizim için önceliklidir. Eğitimlerle katılımı, motivasyonu ve yetkinlikleri artırıyor; çevresel ve sosyal sorumluluk bilinciyle üretim yapıyoruz. Ana hedefimiz, Worimex Co.'yu uluslararası düzeyde tanınan bir kalite standardına taşımaktır. Bu hedefe ulaşmak için tüm gücümüzle ve kapasitemizle çalışıyoruz.

Worimex Co.

Quality and Continuity

As Worimex Co., we are fully committed to continuously improving our quality together with all our employees. We have adopted the Total Quality Management approach and integrated it into all our operations. Our goal is to fully meet customer needs, deliver orders on time, and provide the best service with the right values.

We aim to be a reliable business partner for our customers by continuously improving our product and service quality to enhance satisfaction. We closely follow innovations in our sector, building strong relationships with our suppliers to provide high-quality and cost-effective products.

The development of our employees is one of our top priorities. Through training, we enhance participation, motivation, and skills, while maintaining a strong sense of environmental and social responsibility. Our main objective is to position Worimex Co. at a globally recognized level of quality. We are working with full dedication and capacity to achieve this goal.
