BUILDING THE FUTURE 4U

Build4U, which will be held at ANFAŞ Expo Center in Antalya, will welcome exhibitors and visitors in its first edition, covering all solutions under the main product groups aligned with the city's "smart city" vision.

As an earthquake country, Türkiye focuses on comprehensive urban transformation projects shaped by energy efficiency, earthquake resilience, and sustainability.

In this context, Build4U will host energy-efficient building technologies, innovative materials, green buildings, net-zero and carbon-neutral designs, advanced engineering solutions and next-generation HVAC-R technologies to support the development of smart and sustainable cities.

By bringing together modern architecture, technology and innovation, the exhibition redefines design and engineering standards in the construction sector, while playing a guiding role in achieving energy management and environmental sustainability goals.

ABOUT

Why Antalya? Because

VISITOR PROFILE

- Contractors and Project Developers
